# SECURING PERFORMANCE. TOGETHER.

We are an international producer of high-performance ground support products and services for the mining, construction and energy industries.

Our products and services are engineered to provide safety, efficiency and certainty to your operations wherever you are.

We can provide you with tailored solution offerings for a variety of applications whatever it takes.

We can help you increase project performance and overcome application challenges through a flexible product portfolio with a wide range of differing services, wherever you go.

## WHO WE ARE.

Minova has been developing and delivering pioneering ground support systems for the mining, construction and energy industries since 1882.

With this experience, we have become a global leader, operating in over 25 countries with manufacturing plants on five continents.

Today, we continue to offer innovative products and solutions, including injection chemicals, bulk and capsulated grouts, cementitious powders and bolting systems.

We provide services to mining, construction and energy sectors, supporting new build construction and repair projects on existing assets.

Our rope access team has been established to provide enhanced support to our customers and to increase our service offering for construction and energy sectors.

We can help you to increase project performance and overcome maintenance challenges through our experienced rope access team, who are there to support you, wherever you are.

# SAFETY & QUALITY WHERE YOU ARE.

Our mission is to protect lives by providing products and services, preventing ground collapse, stabilising or repairing structures.

Safety is at foremost of our activities.

We have dedicated ourselves to provide you with products and services to help you and your stakeholders to safely perform under often very demanding conditions.

Our IRATA accredited rope access services are ISO 9001, 14001 and 45001 certified.

With excellent rope access accident frequency rate, you can be ensured that you are in our safe hands.

## OUR INDUSTRIES.

Our rope access team supports a variety of sectors.

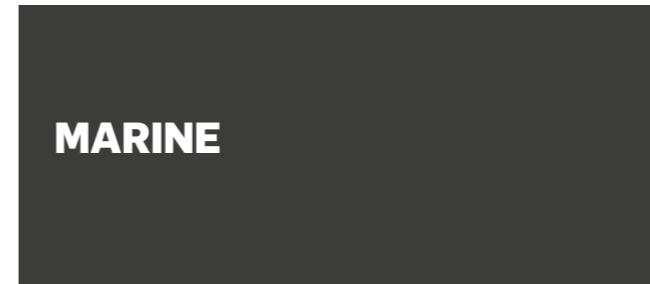

**OIL AND GAS**

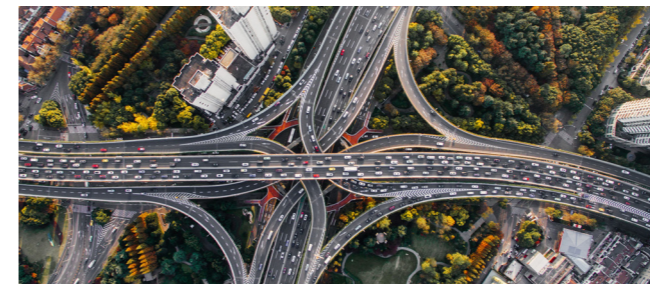

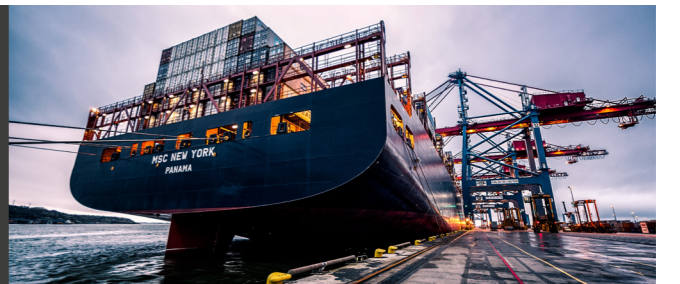

**PHARMACEUTICAL**

**RENEWABLES**

**MARINE**

**INFRASTRUCTURE**

# SUPPORT AT HEIGHT.

We are here to access your hard to reach areas.

## EXPERIENCED TEAM. TAILORED SOLUTION.

With over 30 years of rope access project management expertise, our teams are led by competent and experienced rope access specialists, that work in a variety of industries including:

- Civil and Construction
- Infrastructure
- Oil and Gas
- Renewables
- Power Generation
- Pharmaceutical
- Marine and Defense

## ONE STOP SHOP

At Minova, we provide specialist onshore and offshore trained IRATA rope access technicians that support our customers in the areas that are difficult to reach.

Services are delivered on term contract and project basis tailored to our customer requirements.

Our teams are experienced in the delivery of demanding projects, often, where logistic, weather and time constraints result in significant challenges to the project teams.

We work closely with our customers, helping with pre-mobilisation and project planning, to ensure that the works are completed within the budget.

Our teams are quickly mobilised, often at short notice, and our management works with team supervisors ensuring that we provide services in a safe and a timely manner.
