# WHO WE ARE.

Minova has been developing and delivering pioneering ground support systems for the mining, construction and energy industries since 1882.

With this experience, we have become a global leader, operating in over 25 countries with manufacturing plants on five continents.

Today, we continue to offer innovative products and solutions, including injection chemicals, capsule and bulk grouts and bolting systems.

Our technology road map tracks the major changes developing in our three main industries, including automation, increased safety and efficiency.

We provide services to the mining, construction and energy sectors, supporting new build construction and repair projects on existing assets.

We create long-lasting proactive partnerships with our customers, focussing on delivery of quality products and service offering to where you are.

By partnering with you, we help you increase project performance and overcome your challenges.

Our innovative flexible product portfolio gives you a wide range of solutions, giving you application flexibility when you need it most.

# WHEREVER YOU ARE.

We take pride in operating safely, responsibly and sustainably. In partnership with you and in alignment with your values, we can grow and create real value, making you successful every day.

Safety is at forefront of our activities. We have dedicated ourselves to provide you with products and services that help you and your stakeholders perform safely under very demanding conditions.

Our products undergo stringent testing to ensure that only the highest quality and most consistent products are delivered to your site.

Our patented technologies, bring unique solutions and are highly adaptable allow for product customisation that meets your specific site challenges.

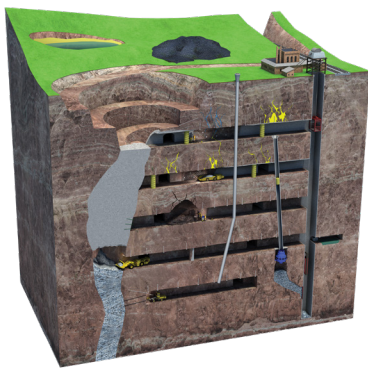

With four dedicated research and development centres around the globe, we work effortlessly, to bring continuous innovation and to ensure the best product reaches your hands.

# OUR INDUSTRIES.

We serve the mining, construction and energy sectors.

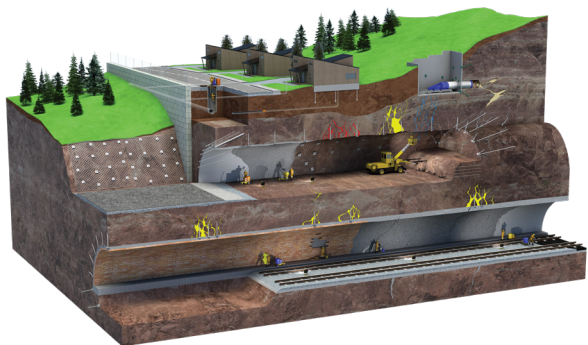

## COAL MINING

We are a leader in providing safe environments in extremely fractured and fluid ground conditions. We understand that safety and efficiency are the key requirements of coal production.

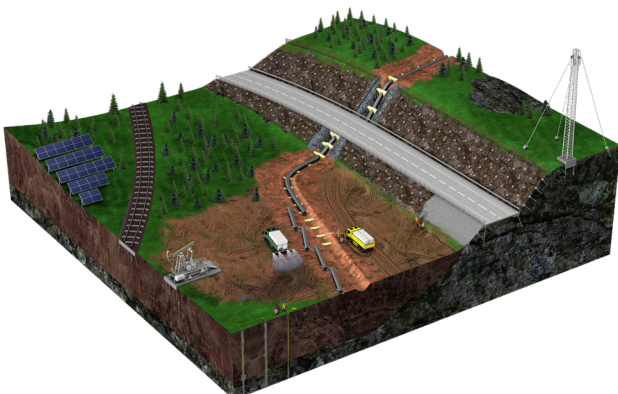

## HARD ROCK MINING

We support underground hard rock mines across the primary commodities. Our products are designed to provide safety, improve efficiency and include automated solutions.

## CONSTRUCTION

Stemming from our mining expertise, we have produced a wide range of products that are used in the construction industry. Our solutions are utilised in both above and below ground assets to secure, repair, restore and rehabilitate.

## ENERGY

We support many types of geostabilisation and structural repair projects in the energy sector. Our products and services include solutions in the oil & gas and renewable energy sectors.

# OUR PRODUCTS.

Our expertise goes back to 1882. Our products are now used on five continents in the mining, construction and energy sectors.

## CAPSULE GROUTS

We are a pioneer of capsule grout technology, including our globally renowned polyester Lokset capsules to our cementitious Capcem anchor grouts. We offer a wide range of capsules to suit your grouting needs.

## PUMPABLE GROUTS

Our products provide a comprehensive solution for our far-reaching global customers. Our grouting solutions range from standard pumpable to high performance, rapid setting and high strength grouts.

## INJECTION CHEMICALS

We offer injectable chemicals that provide a wide range of setting speeds, strengths and internal structures. From ultra foaming to high strength and fast setting, our injection chemicals anchor, consolidate and control gases, water and strata in all types of ground conditions.

## SPRAYED MEMBRANES AND COATINGS

We supply a broad range of wet and dry sprayed products which function as either structural or waterproofing membranes.

## STEEL AND FIBREGLASS

We provide steel and Glass Fibre Reinforced Polymer bolts. Our comprehensive quality control programme ensures that each product arrives at your site just as you have specified.

## ADHESIVES, ADDITIVES, CLEANERS AND SOLVENTS

Our adhesives support the global parquet flooring industry. Our additives are specially designed to adjust the reaction speeds of our powders and resins. Our cleaners and solvents lubricate and maintain your equipment.

## EQUIPMENT AND ACCESSORIES

We provide a range of equipment that meets your needs. Our bolters, mixers and pumps are designed for harsh environments and are built to last.

## SERVICES

We leverage our experience over our long history and develop application solutions for the mining, construction and energy sectors. Our technical services provide on-site support, including installation services and technical support. Our teams are experts at what they do.
