

Flexi-Stop™

Flexible 2psi and 5psi stoppings

Description

Flexi-Stop is a rapidly installed flexible stopping system that has been specially designed by Minova Australia.

Advantages

- Patent Pending stopping system enables rapid installation with between 2-4 stoppings installed per shift.
- Overpressure designed and live tested to rating that is achieved immediately on completion of installation.
- Easily installed in high ventilation areas.
- Flexible structure and sealing system allows stopping to take significant convergence without affecting stopping integrity.
- No dust or fumes generated during installation process.
- Superior cloth strength of over 100kn/m tensile strength ensures resilience to projectile damage.
- Significant reductions in underground transportation requirements.
- Unique fixing system allows easy detachment for vehicle access if required.
- Optional integrated rated door design.

Industry Sectors

Technical Properties

Flexi-Stop is a fully tested and designed ventilation device capable of withstanding mine explosion overpressures of 2psi and 5psi. The Flexi-Stop system is fully certified by Minova's Mining Engineer to ensure it meets specified customer requirements.

Technical Support

Minova offer a complete technical and field support service.

Additional Information

Minova Australia offers a comprehensive range of products, all of which have been developed after extensive research and testing on a global scale via our international network of operations. These products include:

- Resin anchor systems
- High yield grouts and foams
- High volume output grouts
- Monolithic chock systems
- High performance cable bolt grouts
- Polyurethane resin systems
- Binder systems and systems for backfilling
- Pre-packaged high build spray cements
- Sprayable coatings for ventilation control
- Water stop grouts
- Ventilation formwork systems including: Meshblocks, Gunmesh, Tecmesh and Tecplastic
- Grout Mixers and Batches both air and hydraulically operated
- Contract installations
- Flexible membranes for strata support and waterproofing applications
